

Game"MINIRALLY"

This time I ported my QuickBasic 4.5 game called Minirally to TIC-80 , just for: fun, leard lua and enjoy TIC-80 console.

Game description

Drive a car, make a beeter planet collecting radioactive trash and stop to convert into energy. Have fun along 8 levels, that required much effort to design.

Enjoy at

Remember read Installation section (below in this same document)

Motivation

- Have fun, leard lua and enjoy TIC-80 console.
- The original motivations was learning about programming.
- I tried to make a simulation of a real life toy called mini rally (90's)
- This remake II, motivation is to share with the humanity this that I made.

Installation

0-It does not require installation but.

1-If you want to get a stand alone binary, basically must download TIC-80 then download the .tic file to export as: html, .exe, and so on.

2-Example: export html 8_bit_minirally will throw a .zip file with index.html inside.
