

Game"TELEFONO"

It is an imitation of the popular game called Simon but using telephone numbers instead.

Game description

You have to memorize a sequence of numbers and repeat it when it's your turn. You can play alone (against the computer) or against another human (your choice).

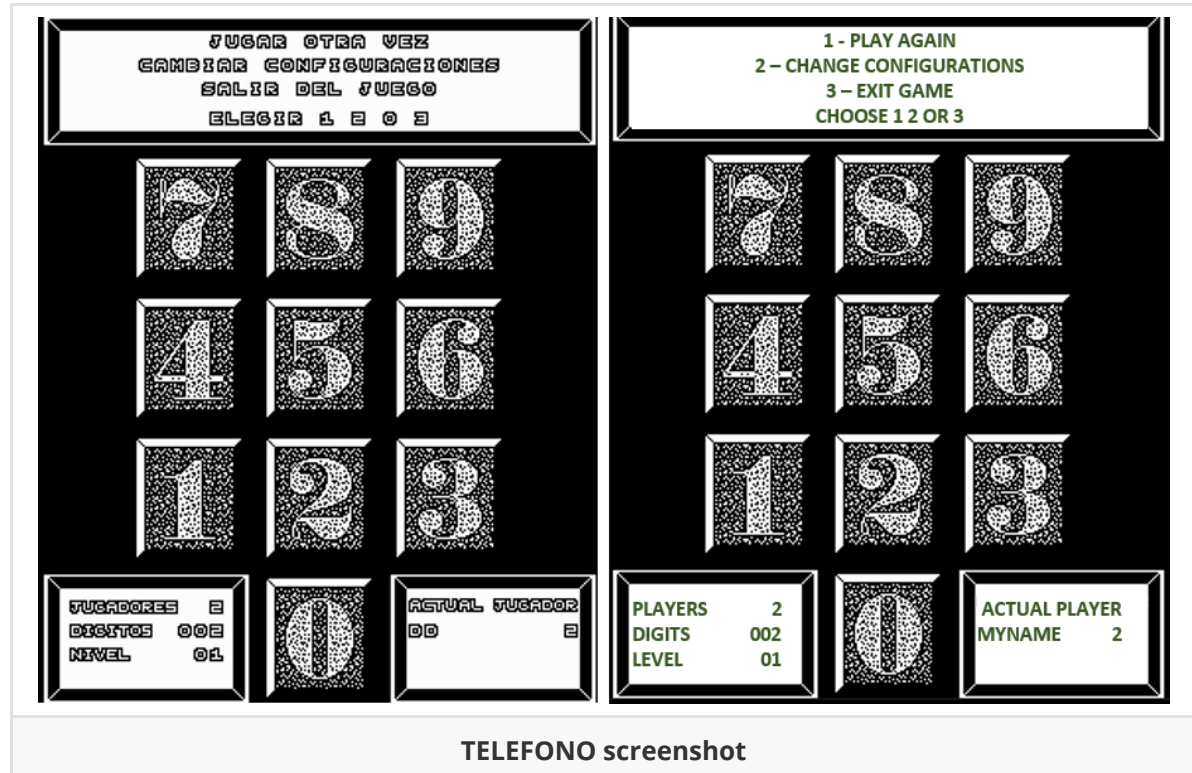

Enjoy at

Remember read Installation section.

Motivation

- NOTE: English is not my first language and the game has not localization, but I made a document with some translation see "doc" folder inside the .zip.
- The original motivations was learning about programming.
- The original motivations was learning about programming.
- This remake motivation is to share with the humanity this that I made.

Installation

0-It works on Windows, Linux (not compatible), Mac (not compatible).

1-Unzip TELEFONO file and run "play_minimized.bat" (this will fire DOSBox-0.72)

NOTE: this game use an emulator of DOS (an old operating system) called DOSBox-0.72 to switch into monochromatic screen resolution and to allow execute the .exe old file.

Build a new version / Sources / Code explanation

This time there in no source code (al least for the moment).
